

Addendum to the description of the genus *Marococandona*, Marmonier, Boulal & Idbennacer 2005 (Crustacea, Ostracoda, Candoninae)

P. Marmonier

Université Rennes I, UMR- CNRS n°6553, Campus de Beaulieu, 35042 Rennes Cedex, France. E-mail: pierre.marmonier@univ-rennes1.fr

In 2005, a new genus of hypogean Ostracoda, *Marococandona*, was described from Southern Morocco (Marmonier et al., 2005). This description did not include the type species of the genus, thus making the genus invalid according to the International Commission on Zoological Nomenclature (73C.2 recommendation; 2000).

The type species of the genus *Marococandona* Marmonier, Boulal & Idbennacer is *Marococandona danielopoli* Marmonier, Boulal & Idbennacer. The type locality is a well at 2 km West of Guelmim, in the Moroccan Anti-Atlas: 28° 58' N - 10° 03' W.

Acknowledgements

I thank Prof. Eugen K. Kempf (University of Köln, Germany) and Prof. Dan L. Danielopol (Austrian Academy of Sciences, Institute of Limnology of Mondsee, Austria) for their comments.
