The article “Microbial community diversity and eco-genomics functions across sediment regimen of a saline lake” by Chen Deng, Oscar Donde and Ze Qing Li (<https://doi.org/10.1051/limn/2022008>) published in International Journal of Limnology in August 2022 is retracted as the data and images it contains present excessive similarities with those published in “Lu, X. *et al.* Microbial activity regulation of volatile organic

compounds with potential fuel oxygenate within East Taijinar Salt Lake, China” published in Applied Ecology and Environmental Research in October 2021 (https://doi.org/10.15666/aeer/2001_447464). The corresponding author of the article published in International Journal of Limnology acknowledges errors and omissions and agrees with the retraction.
