

Special issue of *International Journal of Limnology*
“Advances in freshwater ecology in Sub-Saharan Africa”
Call for papers

Guest editors

- Dr. Christophe PISCART (CNRS, Université de Rennes 1, France)
- Dr. Philippe CECCHI (IRD, Université de Montpellier, France)
- Prof. Allassane OUATTARA (Université Nangui Abrogoua, Côte d’Ivoire)

Contact : christophe.piscart@univ-rennes1.fr

Provisory time line

- Submission deadline: September 30, 2022
- First round of review: October 2022
- First papers published: December 2022

General: The special issue of *International Journal of Limnology* features a selection of recent research outcomes related to recent progress in freshwater ecology in sub-Saharan Africa. This issue covers a wide range of research questions, mainly based on the REMEDA network (Réseau d'Etude des Macroinvertébrés des Eaux Douces d'Afrique) but fully open to other topics. The publications within this issue range from biodiversity and its distribution to environmental monitoring and human health, and cover all types of freshwater environments (streams & rivers, lakes & reservoirs, groundwater and wetlands).

Topics:

- Bioassessment and ecosystem health
- Biodiversity and distribution
- Biological invasions
- Ecosystem functioning
- Eutrophication
- Methodological approaches
- Restoration

Information about the submission and review process:

All manuscripts must be submitted online by selecting the good special issue in the "Section/category" scrolling menu. Submitted manuscripts will follow the same process as all other manuscript submitted to the journal, with no exceptions. The journal will apply a strict selection of the manuscripts. This means that manuscripts must be carefully written and strictly follow the instructions given to authors. We encourage authors to read recent articles published in the journal (<https://www.limnology-journal.org>) before submitting their manuscripts.
